Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The substitute specification filed 22 March 2005 has not been entered because it is not written in clear, idiomatic English. A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter. Further, the graphs at pages 9 and 10 cannot be a part of the Specification since they are Figure drawings.

Election/Restrictions

Applicant's election without traverse of "Group I, claims 1, 2 and 4/2, and....polyfluorene for A and polystyrene for B," in the reply filed on 22 March 2005 is acknowledged. The Restriction requirement is hereby withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the structure, whether it is a set of parallel polymers attached to one another through one site only, or a set of parallel polymers attached through each monomer on each polymer length, cannot be clearly ascertained.

In each of claims 2 and 3, the structure of the bridging unit which is a bond extending from the phenyl ring of the styrene monomer and the single bond of the fluorine monomer is not clear. The inclusion of the parentheses on the bridging unit is not clear. The "O" which lies outside of the bridging bond is not clear as to location.

The recitation in claim 3 of "wherein Ar is aromatic compounds," has no antecedent basis in claim 2 from which it depends.

Regarding claim 3, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim 4 ends with a ":" (colon) and not a "." (period).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Diel, newly cited.

The reference to Diel teaches the identical ladder polymer as recited and claimed herein at column 11 (line 65) to column 12(line 34).

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Bao et al, newly cited.

The patent to Bao et al shows the use of polythiophene as both A and B, as recited herein, at column 3 (line 37) to column 4 (line 6).
